Biocell Lac

A Live Yeast for Improving Calf Performance

Durapak
for Animal Comfort and Crop Packaging

HOW DURAPAK BIOCELL LAC WORKS

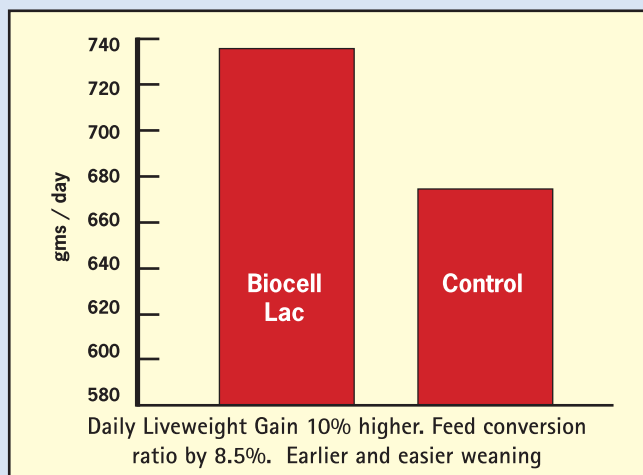

Biocell Lac has been developed specifically for daily mixing into liquid milk or milk replacer. The Live Yeast is incorporated into a lactose base for palatability and easy mixing. Biocell Lac increases the number and activity of specific beneficial bacteria and competes with pathogenic organisms for adhesion sites on the intestinal gut wall. Briefly, Biocell Lac reduces digestive problems by preventing the growth of pathogenic agents in calves and also in lambs.

MAIN FEATURES

- Live yeast for inclusion in milk feed
- Increases the number and activity of specific beneficial bacteria
- Competes with pathogenic organisms and prevents their growth
- Available in 5kg plastic tubs – 1000 treatments, enough to treat 24 calves for 6 weeks

MAIN BENEFITS

- Dry matter intake is increased
- Liveweight gain is increased
- Effects of E. Coli are reduced
- Mortality is reduced
- Feed efficiency is improved
- Weaning weight is increased

WHAT FARMERS SAY...

"General health of the calves has improved. We have less scour, calves thrive better and are going onto their coarse ration quicker since we started feeding Biocell Lac" - **Alan Brown, Rylane, Cork**

"Since we started feeding Biocell Lac, we have less sick calves, less scour and even where we do, the calves recover much faster. The calves are healthier and look good with plenty bloom. I like Biocell Lac because it's a natural product compared with acid" - **Conor Desmond, Berrings, Cork.**

"The calves have never looked better. We have only had 3 calves scour in the last 18 months. The calves thrive all the time" - **Alistair Love, Ayrshire.**

PACKAGING

Biocell Lac is packed in 5kg plastic tubs. 1,000 treatments – enough to rear 24 calves for 6 weeks. Biocell Lac is also available with a natural coccidiostat.

It is recommended to store Biocell Lac in a cool, dry place. The product is non-hazardous and safe.

FEEDING RATES

Calves 5g per calf per day
(or 2 x 2.5g twice a day if preferred)

Lambs 2g per lamb per day

Biocell Lac can be included in all milk diets and will mix easily into all types of milk. This included fresh cows milk, warm / cold powdered milk, also in automatic or bucket feed systems.
